SUPPLEMENTARY CATALOGUE

OF

RARE AND NEW FRUITS,

IN ADDITION TO THOSE COMPRISED

IN THE 34TH EDITION OF

THE GENERAL CATALOGUE OF FRUIT TREES, &c.

CULTIVATED AT

PRINCE'S LINNÆAN BOTANIC GARDEN AND NURSERIES,

FLUSHING, NEAR NEW-YORK.

Wm. R. Prince & Co., Proprietors.

NOTE.—As the accessions to our collection of all highly estimable varieties of Fruits, engages our constant attention, it necessarily arises that we are in possession of them some time before we can announce them in the regular editions of our General Catalogue. Amateurs may therefore confidently rely, that whenever any very estimable varieties are announced in Europe, or in our own country, that we are among the very first to possess them, and as we propagate them rapidly, we can always supply them as soon or sooner than others, and at reasonable rates.

The newest varieties of the following Fruits, are but one year grown from the graft or inoculation—the others are of two years growth.

* The Asterisk denotes Fruits of American origin.

GRAPES.

For an admirable collection of new and very select varieties of the most estimable Table Grapes, see our General Catalogue page 39, and our Supplement Catalogue, No. 8. We also call attention to the 13 new Hybrids from the Isabella, which are there announced. In addition to the fine collection of Table Grapes, we now offer 50,000 plants of native varieties, suitable for market and for making wine, and the time is not distant when our country, which has been preëminently marked out by the Deity as the "Land of the Vine," will be dotted over with luxuriant vineyards, which, when planted with our native varieties, will yield crops six-fold as great as the vineyards of Europe.

STRAWBERRIES.

The splendid Collection of varieties enumerated in the 34th edition of our General Catalogue has been greatly reduced in prices, and we make it a rule to charge always as low or lower than similar kinds can be obtained elsewhere, to say nothing of the superiority of our Collection in excellence and accuracy. The most of the following varieties have been added to our assortment since our General Catalogue was published. More than 50 other estimable varieties are now in our Collection, which we shall announce to the public hereafter when fully proved
